

Exemplary school canteen for the
"Gymnasium am Römerkastell" (grammar school)
in Bad Kreuznach, Germany

Silikal coating for kitchens at the "Röka"

Expect more from your floor.

A tasteful kitchen that can teach a lesson

It's an excellent example of modern kitchen design: the new canteen at the Gymnasium am Römerkastell ("Röka") in Bad Kreuznach. Here, the floors of the kitchen, training kitchen and food counter have all been coated with Silikal reactive resin in an aesthetic light grey colour.

And there is celebrity support for the new Röka canteen in Bad Kreuznach: award-winning chef Johann Lafer has contributed as initiator and operator. He was there for the launch of this

model project, which is intended to help young people "develop their tastebuds" properly.

400 square metres of reactive resin coating broadcasted with non-slip coloured quartz are the foundation for this school canteen. With its seamless hygiene, excellent durability and easy maintenance, this flooring is ideally suited to meet the daily demands of a busy canteen.

Silikal®
made in Germany
since 1951

Skillfully applied by qualified installers and the new floor is fully cured and ready for action within one hour. A perfect way to keep your operation running wide open.

Expect more from your floor.
